

WATER METER CONVERSION TO RADIO READ

Coon Rapids is in the process of changing all residential water meters to radio read meters. With these meters the City can scan consumption readings from the street, and relieves the resident from having to read the meter, then submit the reading.

Northern Water Works has been hired to supplement City employee efforts to complete the change out of meters. Northern Water Works will send a postcard and follow up with a door hanger or personal visit requesting a homeowner to make an appointment to change the meter. Replacement has been completed in the eastern portion of the City and work is now focused in the middle section of the City. Conversion is done at no cost to the homeowner. The only requirement is approximately 20 minutes of your time while the work is performed. Request to see identification before allowing a Northern Water Works representative into your home.

Your help in completing this process is greatly appreciated.
